What will Fitzwilliam Darcy do when his beloved father stands between him and happiness?

Darcy has always emulated his wise and honourable father, George Darcy. But following a sinister act of betrayal by a former family friend, his father rejects his most benevolent principles.

When Georgiana forms a friendship with Miss Elizabeth Bennet, Darcy convinces his father to allow the association to continue. However, Elizabeth soon presents a thorny problem: she entices Darcy as no other lady has before, and with his father's current outlook, he would not approve of her as a daughter-in-law.

Still, Darcy's problem may resolve in time: his father, after getting to know Elizabeth, is certain to recognise her many admirable qualities and change his mind. But what if he does not? In this Pride & Prejudice Regency variation, Fitzwilliam Darcy is caught between the influences of love and duty. Which of these will wield the greatest power?
