inLanguage	english

A Practical Guide into the Insights of Prophesying is a prophetic manual that was written for the purpose of prophetic training and understanding. I wrote the book because of the need I saw in the Body of Christ for simplistic, practical prophetic teaching that could easily be applied. The prophetic ministry is a very powerful ministry when we use it for its God-given purpose. There are also, unfortunately, false prophetic ministries who abuse the ministry. I endeavor in this manual to show the difference between the true and the false. The real and the fake. The authentic and the phony. I believe we are in a truly strong apostolic and prophetic time in the history of the church, and we need strong, genuine, straight-to-the-point teaching to educate the people of God!

This manual will help listeners to understand that just because a person prophesies (speaks on the behalf of God), it does not mean he or she is a prophet. The prophet ministry itself is a fivefold ministry, which we call an office ministry because it is a ministry of authority with responsibility and accountability. God can truly use anyone and anybody because he is sovereign, but he doesn't call all to be prophets.

The manual also discusses prophetic teams and prophetic order. I believe that in the time we are in spiritually in the church, God is raising up strong prophetic teams to do the work of the ministry, because one man can't accomplish it alone. Jesus himself understood and implemented the team concept because he sent out his disciples two by two to go from house to house. I also talk about order, because we serve a god of decency and order. He is not the author of confusion, but in many churches people are confused when it comes to the prophetic. This manual will help clear up the confusion we see!
