David meets Meg. They fall in love and, despite a turbulent relationship, have a child together fulfilling David's dream to be a father. After they separate, David has to fight the mother and Family Courts to see his daughter and also battles against the incompetence and lies of the Child Support Agency who seem hell-bent on ruining him, emotionally and financially. A must-listen for any parent. For anyone who has had to deal with the CSA/CMS and the Family Courts, this is compelling listening. Thought-provoking, honest, extraordinary, revealing. A damning indictment of the Child Support Agency and Family Courts. If the measure of a good audiobook is its afterburn, *Access Denied* is a great audiobook. When you've nothing left to lose, what else can you give? A quite extraordinary true story.
