With a Senate career that has spanned more than four decades, Edward M. Kennedy has become one of the strongest voices in American politics. In *America Back on Track*, he argues that America is at a crossroads, having reached a point where it has departed more deeply from its fundamental ideals than at any time in its modern history. In response to the erosion of the nation's basic values, he presents a sweeping agenda for reform and renewal, speaking to the country's most significant needs at home and abroad. National security, the war in Iraq, terrorism, and key domestic challenges such as jobs, health care, education, civil rights, energy, and the environment all receive major attention in his proposals to counter the harmful policies of the current administration, restore America's respect in the world, and create a better America here at home where democracy, individual opportunity, equal justice, and innovation can flourish. <p> With his first major policy book in more than twenty years, Senator Kennedy takes an in-depth look at our modern political landscape and offers innovative policies that he genuinely believes will guide the country effectively to the future.</p>
