2026-07

## Synopsis

---

author	Scientific American
readBy	Graham Halstead
inLanguage	english

In this installment of the Ask the Experts series, *Chemistry*, our professors, scientists, and researchers tackle reader questions about the substances that compose all matter, their properties, and how they interact and change. Queries range from elementary questions, such as why some elements change color over a flame, to how chemistry works in everyday life, to how certain substances affect the body and more.
