Based on Mark McGregor's *10 Principles of Leadership and Life*, *Being on Mission* tells the story of Michael Weber, the typical, overworked manager, struck down in both his personal and professional life until he arrives at an all-time low. His ensuing transformation begins with the help of two mentors and a powerful leadership training workshop. Michael becomes aware of his situation, takes responsibility for his circumstances and his actions, and acquires the courage to change. Along his journey, he develops into a more effective leader and establishes clarity and purpose by defining his values, his vision and his mission. Thereby, Michael ultimately alters the way he approaches his work, prioritizes the things that really matter, and begins to lead a more meaningful and purposeful life. This is a story of inside-out transformation and leadership development, and with the lessons learned by Michael Weber along his journey, you, too, can transform yourself professionally and personally.
