<p>Struggling to teach your kid? Want your children to love math? Then you need to keep reading...</p> <p>You should have experienced when your children do not listen to you , especially when you are teaching them, you probably want to hire a tutor or just send them to a daycare or kindergarten.</p> <p>This happens even more when you teach your children math, they just randomly give you an answer and try to get over with it. You might doubt yourself whether your children do not like math or I could not teach my children at all.</p> <p>Statistics show actually 46.2 percent of kids love math and 30.5 percent like it.</p> <p>How come your children are not one of them? This is mostly because we are transferring how we learn math back in our school days which relied heavily on memorization to learn facts and procedures. With the right technique, your children will be the one who love math. In this audiobook, you'll discover:</p> <p></p> <ul> <li>Easy and powerful method for addition from 1-10</li> <li>Interactive learning experiences</li> <li>Loads of fun addition problems</li> <li>Multiple completion opportunities</li> <li>The focus grabbing technique that your children will learn math</li> <li>And much more...</li> </ul> <p>You could be the best teacher for your children, even if an elementary school kid could teach their younger siblings.</p> <p>So if you want your children to love math, then you need this audiobook today!</p>
