Jim Marris, author of the international best-selling book JFK book of all time, *Crossfire: The Plot That Killed Kennedy* takes you deep into the conspiracy of John F. Kennedy's untimely death with factual information that rules out the lone assassination theory. Marris' work was the basis for the hugely successful Oliver Stone film *JFK*. Fifty years after the event that rocked the nation and shook the world, Marris reveals the facts behind the most audacious cover-up of our time, how it was planned, who executed the conspiracy, who benefited from it, and ultimately why this extremely well-orchestrated assassination could be so cleverly concealed. This extensively researched audiobook includes evidence proving the Warren Commission's report was a cover-up and a smoke screen for the true conspiracy. Learn why Lee Harvey Oswald could not have been a lone gunman, and that multiple shots were fired that fateful day. The evidence does not lie and all the evidence is here. Jim Marris takes you through the most important historical event of the 20th century - the assassination of a United States President.
