Welcome to a float trip through Hell.

When the love of Tam's life vanishes in the Dreadmire, a vile swamp created by magical fallout from the Great War a century before, he knows he must find her. With his companions, a would-be paladin, a halfling with visions, and a local guide, Tam braves the twisted creatures and land.

But the Dreadmire corrupts all it touches, and even the best of intentions do not give the party immunity to its effects.
