Synopsis

author	Dave Aziz,	Andrew Ramsey
readBy	James Hugg	
inLanguage	english	

What is the difference between save money and invest money? How do I measure my long term results? What could be practical applications? These are some of the classic questions that people make when they want to start investing money and time in any business. This is this newbie investor audiobook you **absolutely** need to listen to, if you are completely clueless about investing. It is aimed at people who have managed to save a bit of their hard-earned income with banking but are completely stumped as to what to do with their savings. Throw away the get-rich quick schemes that never work and turn off the financial news and it's constant noise. Whether your dream is protecting your assets in a turbulent market or growing your wealth so that you can retire in style, this audiobook is the blueprint. While many investing and finance audiobooks can be bogged down with complicated financial terms and other fluff that makes it difficult to get past the first few sections, this audiobook is deliberately to the point and easy to follow. So, what are you waiting for? Stop crippling your savings by letting them languish in a savings account and start putting them to work in a big way. Take control of your financial future and buy this audiobook today!
