Dexter meets Grammar Nazi in this psychological thriller with a twist.

Seventeen gruesome killings were report across the US, within six months and there was one clear connection among victims. They were all writers. While media was decorating the murders with sensationalist stories, and law enforcement was playing catch-up, the homicidal maniac remained elusive and secretive. The situation took an interesting turn when one day she appeared on a dark-net talk show for an honest chat. Though her reason for being there was not a quest for fame but something far more disturbing.
