The sad truth is that the US criminal justice system doesn't work for many different reasons - from our overflowing prisons, to the destructive war on drugs and disproportionate effect on minority communities, to conflicts between police and citizens and problems with prosecutors and the courts.

In *Fixing the US Criminal Justice System*, author Paul Brakke provides an in-depth look from a conservative perspective at the many flaws in the system and how to fix them. The chapters in the audiobook cover these topics:

- Why our criminal justice system is a national shame
- How families suffer severe collateral damage
- Alleged misconduct by the police
- How powerful prosecutors misbehave
- When judges show bias and exceed their judicial power
- How the media makes matters worse with their sensationalized coverage
- Nine prescriptions to fix our broken criminal justice system

This is an important break-through audiobook that shows the damage of the system not only to individuals accused of crimes but to their families, the economy, and society as a whole.
