Synopsis

author	Robert Liparulo
readBy	Bob Michaels
inLanguage	english

The list of 10,000 names was created for maximum devastation - business leaders, housewives, politicians, celebrities, janitors and children. None of them are aware of what is about to happen, but all will be part of the most frightening brand of warfare the world has ever known.

The germ, an advanced form of the Ebola virus, has been genetically engineered to infect only those people whose DNA matches the codes embedded within it. Those whose DNA is not a match, simply catch a cold. But those who are a match experience a far worse fate. Within days, their internal organs liquefy.

Death is the only escape.

The release of the virus will usher in a new era of power where countries are left without defense, where a single person - or millions - could be killed with perfect accuracy and zero collateral damage, where your own DNA works against you.

The time isn't coming. It is now.

Pray the assassins get you first.
