It is the beginning of a new era for mankind with the discovery of a revolutionary new power source.

Rickey Ormand is one of the most powerful men in the world, thanks to some clever engineering and pioneering thinking. He stands on the edge of one of the greatest discoveries mankind has seen: gravity power. All other forms of energy will become obsolete.

But with great power comes great lust. And jealousy, treachery, and intrigue. Only pure-hearted vice-presidential candidate Camille O'Keefe seems to have the world's best interests at heart. Can a world of greed and cunning stand in her way?
