Hypnography for Women is a sensual and tasteful audio fantasy experience. It is designed to help you relax and reach fulfillment through guided imagery. A sensuous man's voice will guide you into total relaxation from your toes to the top of your head. As you go further and further into this state of deep relaxation, you will feel more and more comfortable and peaceful.

Hypnography for Women creates the illusion of an attractive and attentive man who can easily be envisioned as your lover. He will ask you to imagine inhaling anesthesia; you will feel numbness and tingling. Then, as he asks you to ride down in an elevator, sexual guided imagery begins. The voice will ask you to envision yourself taking a soothing bath as your senses come alive.

Hypnography will satisfy both the sexually active woman and those experiencing lack of arousal. It is a most pleasurable addition to your library.

For adults only: Explicit language. Must be 18 years of age to purchase.

Warning: Do not listen to this program while driving or using heavy machinery.
