Killers of the Zodiac - Fire Signs looks at 9 serial killers and the different astrological signs they belong to, the year they were born, and the crimes they committed. Included, you will find killers from **The Houses of Aries, Sagittarius, and Leo**.
Female Serial Killer Judias Buenoano moves from state to state, changing husbands along the way. The problem is people around here keep mysteriously dying. Is she the most unlucky woman alive? Or has she been killing everyone that stands between her and a payday? **Jesse Pomeroy** is one of the youngest killers of all time who was not only caught and convicted but released and allowed to kill again. The things this boy did to other small children will leave you questioning everything. **Antone Costas** influenced a collection of essays that Kurt Vonnegut wrote. He traveled across the countries in the late 60s, killing women in Massachusetts. But he might have killed a few in the Haight Ashbury area of California when he was hanging out there when Charles Manson was building his murder family. **And 6 other stories filled with murder, lies, and messed-up motives.**
