Synopsis

It's no secret that the American education system is broken. But sometimes it seems like even pointing out the massive flaws in the system is *rebellious*. What else is rebellious? Suggesting that public school isn't the only way for children to learn effectively. Actually, it might just be causing more harm than good these days. Because no child is the same, which means that no child learns the same way. And, while there are incredible educators in the public and private school systems, the ...
