Libido Reboot: A Widow's Sexual Journey is a true story about the sexual reawakening of a woman after several years of celibacy following the death of her husband. It is an honest account of her search for sexual gratification gained through sex toys, escort services, and online hookup and dating sites. Her experience led her to believe that others, in particular, baby boomers, could learn and be inspired by her journey. This timely book provides excellent relationship advice designed to help both men and women ultimately discover how good sex and intimacy is for their health and well-being.
