The life and ministry of Maria Woodworth-Etter has captured the imagination of Christians for generations. Many books have been written about Maria, but none quite like this. This book is not just another biography - it's a window into the supernatural.

Drawing from the diaries and teachings that Maria left behind, this book focuses solely on the supernatural experiences and visitations that she had throughout her life. From miraculous healings to prophetic visions, each account is more breathtaking than the last.

And unlike many of the books that have come before, we have modernized this one for easier reading. We have replaced the archaic language of the past with modern words that make the stories come alive in a whole new way.

As you read these incredible accounts, you'll be inspired to believe for the same works of God that Maria experienced. Her life was a testament to the power of faith and the supernatural, and this book will leave you with a sense of awe and wonder at the incredible things that God can do. So dive in and be prepared to be amazed!
