A science experiment gone wrong. A dangerous secret life revealed. An immortal's dark journey to find redemption in a world of forbidden love, vampire passion, and dangerous obsession.

Anton, a handsome immortal vampire, was created through a dangerous science experiment in the late 1970s. Driven by blood thirst and the crushing loneliness of eternal life, Anton's existence has been defined by isolation and deep depression. After years of wandering in the shadows, he's ready to end it all. With a bucket list in hand, he plans to say goodbye to the world until fate intervenes.

When he meets **Tangi**, a beautiful woman freshly out of a toxic relationship, their electric chemistry is undeniable. Despite their over half-century age difference, the connection between them is instant, deep, and unexplainable. But Anton harbors a dark secret—he's a vampire—and he's desperate to keep it hidden from the woman he's falling for.

Tangi, however, is no stranger to secrets. Her ex-Grand, a mortal monster with a terrifying obsession, will stop at nothing to destroy what they've built. Can their love survive the sabotage of a dangerous enemy, or will their unconditional bond be torn apart by his malevolent interference?

In this gripping paranormal romance with an unexpected twist of science fiction, vampire lore, and immortal love, Anton and Tangi will have to confront their darkest fears. Can their everlasting love withstand betrayal, dangerous secrets, and deception? Will they find a way to fight for each other, or will the shadows of the past pull them apart forever?
