inLanguagei¼š	english

At a time when mankind should have been reaching for the future, life devolved into a nearly apocalyptic present, pitting neighbor against neighbor and nation against nation as three different viruses ravaged the population. Civil wars reduced the world population even more.

Then came the asteroid Wormwood, and everything changed. Man did what nobody expected...they pulled together and worked to save the planet and themselves. Years after the space rock did its damage, people began to change. Old tensions were brought back as those afflicted were targeted by the fearful.

Then the real monsters appeared, and nobody was ready for what happened next.
