readBy	Naomi Rose-Mock
inLanguage	english

What happens when six middle-aged sisters with a party planning business buy a cursed plantation? Add one ghoul, the Queen of Voodoo, and a dash of unlocked dormant magic and find out!

When Dani convinces her five sisters to sink everything they have into purchasing a dilapidated old plantation, it seems like a great idea at the time. They need a site to expand their business, and none of them are strangers to the occasional escapade. Little do they know buying Willowberry Plantation House will be the biggest adventure of their lives.

As New Orleans natives, the sisters aren't at all surprised to find a ghost haunting their new house. What they don't see coming is their discovery that the land was cursed by a wrathful witch centuries earlier. Then things get really strange when Phoebe pays them a visit, unlocking more than just the magic trapped in the earth as she removes the hex that plagued the plantation.

Can their business thrive with a ghoul on the grounds, an angry Voodoo Queen to appease, and a leaky roof to fix? As the sisters scramble to pull off their very first shifter mating ceremony, two things are certain: They won't make it without each other, and they've stumbled upon some incredible new powers they don't yet understand.
