Dedicated scientist Laura Manning's IQ is off the charts. But beneath her pristine white lab coat is a curvaceous body that craves satisfaction. And it's hard keeping her mind on the experiment and off what's under the lab coat of her research partner, Jay Cutler, whom she's working with to develop a libido suppressant for a society gone sex mad - especially when Jay offers to act as a human guinea pig.

Laura's job is to entice Jay, to determine if the suppressant tamps down his desires - but the "antidote" seems only to heat them up...and there's only one scandalous way to deal with it! With long days of laboratory work giving way to sizzling nights of sensual experimentation, soon their pleasure games are getting a bit out of control.

But who in her right mind would pull the plug on her man's libido when the loving is this deliciously hot?
