Life always seems to be more complicated than it should be for Charlie Mortdecai: degenerate aristocrat, amoral art dealer, seasoned epicurean, unwilling assassin, and confirmed coward. *Something Nasty in the Woodshed* finds Charlie exiled from London due to his growing unpopularity on account of some shady art deals. Taking refuge in a country estate on the Channel Island of Jersey, he embarks on a well-intended hedonistic interlude. But his vacation soon morphs into a macabre manhunt, as Charlie seeks to expose a local rapist whose modus operandi bears a striking resemblance to that of a warlock from ancient British mythology known as "The Beast of Jersey".
