Twenty-four billion dollars were spent on NFTs last year. Keep reading to gain the exact blueprint on how to profit from this growing trend. *Spill the NFT* is a book for people who want to understand the basics of NFTs and cryptocurrency for those people who keep hearing the terms thrown about but don't really feel comfortable investing in NFTs because they lack sufficient knowledge. It's a book that will explain the basics of this somewhat complicated fad in an engaging, fun, and informative way. It will also give you basic tips to understand what NFT project should lend itself to being a good investment, as well as a blue print on creating and minting your own NFT art. *Spill the NFT* will teach you:

- A brief history of NFTs and why they recently became so popular
- How NFTs work and what the different types of NFT are
- How to make money investing in NFTs
- What the different marketplaces are
- Creating a successful community as a crypto artist

“Never invest in a business you cannot understand. You have to learn how to value businesses and know the ones that are within your circle of competence, and the ones that are outside” (Warren Buffett)

This quote from arguably the world's greatest investor rings very true when it comes to NFTs. And it is one of the very reasons why the author published this book. Max V Palmeira was an early adopter of NFT art, and has since created and minted plenty of successful crypto art. When Max first started his crypto and NFT journey, he was frustrated by the lack of easy-to-digest information on the subject. As such, he embarked on a mission to learn everything there was to learn on the fascinating topic of NFTs. A few years later, and having minted and created dozens of NFTs, he makes a healthy living working in the NFT industry. With his trading strategy set on auto pilot, Max's passion now lies in teaching beginners about the NFT market. His biggest frustration when starting out was the lack of simple guides written in

layman language. Heâ€™s now on a mission to teach NFTs in a simple and informative way. What took him two years to learn he distills in two hours in *Spill the NFT*.</p><p>If you want to start making your first NFT dollars in just seven days, then scroll up and click the "Buy Now" button.</p>
