Based on the classic Sten Series by Allan Cole and Chris Bunch. Fresh from their mission to pacify the Wolf Worlds, Sten and his Mantis Team encounter a mysterious ship that has been lost among the stars for thousands of years. At first, everyone aboard appears to be long dead. Then a strange Being beckons, pleading for help. More disturbing: The presence of AM2, a strategically vital fuel tightly controlled by their boss - The Eternal Emperor. They are ordered to retrieve the remaining AM2 "at all costs." But once Sten and his heavy worldlier sidekick, Alex Kilgour, board the ship they must dare an out of control defense system that attacks without warning as they move through dark warrens filled with unimaginable horrors. When they reach their goal they find that in the midst of all that death are the "seeds" of a lost civilization.
