We are at a critical point in human history. Humanity is under threat, but all is not lost. We can take action! But how? *Sustainable IT Playbook for Technology Leaders* will show you how.

It will walk you through the construction and implementation of a sustainable IT strategy and enable you to do your bit for the future of mankind. The audiobook is split into three parts.

Part one details the "why." It discusses the clear and present danger that humanity faces today: the climate crisis. How did we get here, what are the immediate threats, what are the planetary boundaries that we need to peel back to safe levels, and what impact does IT have on society at large?

Part two will focus on the "what." It examines the nitty-gritty details of what we can do to unlock significant returns on sustainable investments toward a more sustainable future.

Part three, the final part of the audiobook, focuses on the "how." How do you turn your ideas into action? What do you need to do to establish your baseline and direction of travel towards your objective? This part provides tangible case studies and explains how you can start your journey today to begin delivering global and impactful objectives.

By the end of this audiobook, you'll be able to plan, implement, and communicate a sustainable IT strategy, setting yourself apart as a progressive technology leader.

PLEASE NOTE: When you purchase this title, the accompanying PDF will be available in your Audible Library along with the audio.
