The Girl Who Could Dance in Outer Space is the second book in The Girls Who Could Series. It tells the tale of young Mae Jemison, the creative girl who became a doctor, an engineer, a dancer, and an astronaut. Mae Jemison teaches us that art and science are natural expressions of creativity and imagination. Nurture them both, and go where your dreams take you!

The Girls Who Could is a fun, colorful series of stories about real women who have made a difference in the world through inspired action. By giving young girls examples of people who have done big, amazing things, children grow up with a template of achievement upon which to grow and expand their own dreams and goals.
