The findings of historians and archaeologists open a thrilling world of discovery as they bring their methods and insights to the iconic stories of the Bible. These 24 content-rich lessons take you on a multidimensional journey through the Bible, from Genesis to the Crucifixion, through the lens of the latest historical and archaeological research.

Through Professor Isbouts's™ enthralling commentary, you'll uncover eye-opening perspectives on biblical events such as:

- Genesis - Examine evidence from ancient Sumer of a monumental flood that happened 5,000 years ago and study Mesopotamian architectural forms that may correlate with the story of the Tower of Babel;
- The Exodus from Egypt - Follow the actual path of Moses and the Israelites, a well-traveled artery through mining regions, oases, and trade routes from Egypt to the Midian, the region southeast of Sinai;
- The Kingship of David - Relive David's™ divisive rule as king of the Hebrews and visit structures excavated in the "City of David", which may be the core of David's™ residential and administrative complex;
- Israel under the Assyrians - Learn how an ancient Assyrian clay document confirms the Bible's™ account of the Assyrian invasion of Judah and view the magnificent Assyrian tableaux that depict the siege of the city of Lachish, described in the Bible; and
- The Early Life of Jesus - Take a penetrating look at the peasant revolts and bloodshed in Galilee during the youth of Jesus, after which Joseph and Jesus were likely to have been conscripted laborers for the Romans.

Deeply fascinating for those who have an interest in the Abrahamic faiths, ancient civilizations, and archaeology, *The History and Archaeology of the Bible* throws fresh and revealing light on the iconic scriptures that - in far-reaching ways - have shaped our world.
