**Lives are forever changed in this heartwarming beach listen! A story of hope, family, and love among the dunes and salty spray, off the coast of South Carolina, *The Island of Summer Sunsets* is the perfect escape for fans of Kristy Woodson Harvey, Brenda Novak, and Nancy Thayer.**

In the small Southern village on Fripp Island, where the daily tide swells and minnow counts are the biggest news, Janie Brooks lives in a beach bungalow next door to her mother, and her life is moving along at about the same slow pace as the island—exactly the way she wants it.

After the death of Janie’s husband, unable to find her own way, she continues to follow her husband’s passion for island conservation and spends her days with the seagulls and swallow-tailed kites in the serene bliss of the Atlantic coast. Until newcomer Ryan Kennedy and his teenage daughter move into the rental down the street, shaking up Janie’s well-ordered, simple life.

Ryan has enough to deal with, being a single dad and managing his daughter’s grief over the abandonment by her mother. All he wants is to move into a brand-new house in this quaint community and start fresh. But that might be easier said than done.

Will Janie and Ryan find their own version of paradise? Or will one get in the way of the other?

**A summer escape that will whisk you away to an island getaway and have you wishing for a seaside retreat with your feet in the sand and the golden sunset at your back.**
