Another Crusade for the Lunar Free State!

After years of planning, the Lunar Free State is going to war, on a crusade to liberate the people of Tatanna from the evil Bugs.

For Lorna Greenwood, this will be a trial by fire—her first mission with her own command, the *Predator*-class destroyer LFS *Lynx*. She’s looking to get some payback for her last trip there eight years ago, which didn’t end well.

For Nova Sakura, it will be a time for action with the Marines down on the planet, a time to take care of unfinished business and make good on the promises she was forced to leave the locals with on her first trip to Tatanna.

But the Bugs aren’t the only enemy the Lunar Free State has to face. While they’re fighting to liberate a planet 50 light years away, someone else is planning to hit them a lot closer to home.
