Life is a mystery. How can it be understood? Life is an ocean. How can it be navigated? Throughout history there have been some basic options presented to humans about how to navigate life - options that offer a map of what kind of reality we live in and how we can steer through it. It would be nice if we all already agreed on these basic issues, but we don't.

And even though we may have been raised with mental maps of reality that seem to have worked thus far, we all owe it to ourselves to think about whether what we have taken for granted is really true. This book is an argument that the mystery of life is best understood through the mystery of Christ.

*The Pajama Philosopher* focuses on making a cognitive case for Christianity by examining its philosophical, theological, and practical roots and ramifications. More importantly it invites listeners to become truly self-aware about what they already believe in order to then be able to scrutinize their stances toward reality. In a personal and nonacademic style, this book explores some of the deepest intersecting issues of philosophy and religion. It compares cosmologies and then argues for a vision of history that aims for the transformation of all human life. Beginning with your own.
