A fisherman makes a find in a pond that tears a small town apart. As the mystery unfolds more people become involved and the conflict grows. A trout pond, like a small town, has big fish eating small fish. All kinds of creatures live in and around a pond, and it's the same in a small town, the bigger they are, the better the catch, or the harder they fall! *The Trout Pond* tells about people who change. Most of us are resistant to change, but as you will see in this story we can and do often change when the circumstances force us, or when the opportunity for a better life comes along.
