Fact or Fiction?

Many people do not believe the events in the *end of the age* Jesus and the prophets described in the Bible. They doubt the prophesied one-world government could be established and ruled by one man – the Antichrist. They find it unbelievable that to buy and sell every person must take the *mark of the beast* or they will be beheaded (Revelation 20:24). They question how can a God of love could destroy billions of people. These descriptions of the end of the age frighten people. Many people describe these prophecies as *fictional tales*. They cannot grasp how one worldwide government could control buying and selling. However, multiple Bible prophecies that are equally as incredible have been documented in history as factual – several major ones are described in this book. If you believe the Bible, the terrifying end of the age events will happen in the United States and in the world. Big Tech, Big Media, and Big Government are powerful forces in the U.S.A. Together, they evoke the image of the hydra, a horrifying multi-headed beast in Greek mythology. The mythical hydra instilled fear because each head possessed unique powers of destruction. These three heads are uniting to create a *Perfect Political Storm* in the U.S. Big Tech, Big Media, Big Government, and the citizens of the United States are unknowingly transforming our nation into a key player to make some of these events feasible – especially how to control buying and selling. This may seem like fiction or a bad dream, but if you examine how the Chinese government is using technology today to control over a billion people, controlling buying and selling is possible. Are we seeing today a preview for future governmental controls from our local, state, and federal governments as they issue mandates that prohibit people who have not taken the COVID-19 vaccine from entering restaurants and large social events without a proof of vaccination card? Is this the beginning? God’s plan to redeem humanity is quickly approaching fulfillment. The hydra and most people in the U.S. are

unaware that God will create an ***Ultimate Perfect Storm*** to fulfill His plans for humanity.
The pending storms are described metaphorically to depict the convergence of forces attacking our liberties and our nation's founding and heritage. This book reveals a largely unrecognized sign of the End Times which is based upon Bible prophecy - technology.
Please read the book to discover a possible future scenario of how Bible prophecies will play out!
