What is the real truth behind the universe? What are the Christian points of view and the spiritual truths of the universe?

Many human beings have sought to find out just how this great big world started. All have their beliefs and opinions. Some say with a big bang, others are drawn to evolution and Christians give credit to a higher power, whom they believe can reveal spiritual truths. They believe there is one God, Jehovah, the father, the almighty, the creator of the heavens, and earth, the seas, and everything that's in them; and Christ Jesus, the son of God, who became embodied in the flesh for their salvation and the "Holy Spirit"; being God's power in action, invisible to the human eye. Christians also believe that the universe was created in six day by the creator, and then he rested upon the seventh day.
