When Dr. Blake Farnon hits a shadowy figure with his car, he is astounded when the man almost instantaneously recovers from the accident. But Daniel Vale is no ordinary man, as Blake soon discovers. Daniel is vampire, and, in addition, works for the US government in a secret department of the FBI.

At first wary of the undeniably handsome vampire, Blake cannot resist Daniel's allure for long. From the moment Daniel shows up at Blake's apartment with a poisoned silver sword imbedded in his side, Blake is hurled into an adventure beyond his wildest imaginings.

Demons, ancient gods and a vindictive goddess determined to tear apart the fragile fabric of world peace after the Middle East War, can only be stopped by other supernatural beings—vampires. And Blake finds himself caught up in the fight, whether he wants to be or not.

Can his fledging relationship with Daniel possibly survive? He'd thought it crazy enough he'd fallen for a vampire, but the rest of it? What would his mother say?
