My sister died. Her friends lied. And now that I've brought them all together, I'm going to learn the truth....

My twin sister, Samantha, died a year ago.

This weekend, I'm staying in a beautiful wood-paneled cabin in the mountains with her closest friends. There's a firepit and hiking trails through the trees. It's the perfect place for us to talk and remember her.

But I'm not here for that. I'm here to find out what happened.

I've always known there was something suspicious about her death. But no one believed me. Then I found her journal, tucked into a hidden space in the window seat of our childhood bedroom, and what I read there changed everything.

The journal shows who they really are. The fraud. The liar. The cheat. The crush.

And I'm going to confront them. Expose their secrets. One of them killed her, and I will prove it.

But then the journal vanishes, one of us is attacked, and fire breaks out on the mountain. What will I risk to get justice for Samantha? And how far am I willing to go?

An absolutely compulsive thriller! If you like *The Hunting Party*, Ruth Ware, and *The Summer House*, you'll love *The Weekend Away*!
