Fate doesn't exist. But try telling that to the growling wolf shifter who thinks I'm his mate . . .

This is not my week. Or month. Or year.

My now-ex-boyfriend cheating on me with my best friend? I'd get over it eventually. Finding out my sister has Lycan wolf DNA and I have hours to get her out of the city before she's locked away in a government research facility? I definitely didn't see that one coming.

To save my sister's life, we take off in the middle of the night following cryptic instructions from our late father to what was supposed to be the toxic wastelands. Imagine my surprise when we stumble into a fairy tale civilization of wolf shifters where magic is real and a frustrating, but ruggedly handsome pack enforcer has serious plans for me.

The big, bad, and hungry wolf thinks I'm his fated mate and he's not taking no for an answer. That's just the icing on the metaphorical cake. But this isn't some magical bedtime story. Real danger exists in the Cerberus pack. There's a poison in the ranks. Shifters are leaving. My sister isn't safe.

And a blood-thirsty Alpha murders anyone that challenges him. Which I mayâ€”or may notâ€”have accidentally done . . . Did I mention today is not my day?

Contains mature themes.
