You enter a trade only to see your position move rapidly against you. Author Jobe Leonard describes experiences of the same and lovingly names the phenomenon the "Ticker Trolls".

Along with a detailed explanation of how to beat the ticker trolls, the author also sets you up for success with an easy-to-use training program and risk-management setup to show you how to day trade and figure out if trading is something that might work for you, while learning what makes the world markets tick.
