Can you trademark life, knowledge, and ideas?

Imagine if the ancient Greeks suddenly decided to patent philosophy, medicine, and architecture. Imagine if Newton and Galileo decided to patent the laws of physics. Imagine if Shakespeare decided to trademark the words swagger, unreal, and skim-milk.

For thousands of years, people have been creating and sharing ideas and knowledge with the rest of society without any restrictions.

And the results were crucial for humanity. Western civilization, the exploration of space, and the evolution of the English language come to mind.

However, we live in an era of trademarks, patents, and copyrights that have a stranglehold on the free movement of knowledge, ideas, and thoughts.

So, the question really is...

How much do you really know about intellectual property, patents, and trademarks?

Annheete Oakley, the author of this eye-opening trademark copyright audiobook, will offer you an in-depth analysis of the current intellectual property field and allow you to:

- Learn more trademarks, patents, and intellectual property
- Understand the pitfalls of intellectual property rights
- Discover why certain patents should not exist

This is not your typical "intellectual property in a nutshell" book:

By the end of this game-changing patents trademarks audiobook, you will be able to view at the world of intellectual property rights with fresh eyes and fully comprehend the dangers that are encircling free knowledge and free ideas.

What's in it for you?

Broaden your horizons and stop looking the other way while greedy organizations and individuals try to slap a trademark sign on society's future. Invest in your freedom of thought and start exploring potential solutions that might put an end to the intellectual property struggle and give society the opportunity to reach...

Ultimate knowledge and ultimate power!
