readBy	Jeffrey Jared
inLanguage	english

Unceremoniously dumped by his fiancée, Mitch moves to London for what is to be an 18-month wild ride with bad decisions and extreme characters. While he's under siege by obnoxious bosses and maneuvering a barrage of advances from men and women of all ages, Mitch's intimate confessions and musings are simultaneously delightful and embarrassing. He may lack principles and have a complete disregard for consequences, and he's not easy to like - but he's entirely entertaining.
